

Job Brief

We are looking for a **.NET developer** to build software using languages and technologies of the .NET framework. You will create applications from scratch, configure existing systems, and provide user support.

In this role, you should be able to write functional code with a sharp eye for spotting defects. You should be a team player and excellent communicator. If you are also passionate about the .NET framework and software design/architecture, we'd like to meet you.

Your goal will be to work with internal teams to design, develop, and maintain software.

Responsibilities

- Participate in requirements analysis
 - Collaborate with internal teams to produce software design and architecture
 - Write clean, scalable code using .NET programming languages
 - Test and deploy applications and systems
 - Revise, update, refactor, and debug code
 - Improve existing software
 - Develop documentation throughout the SDLC
 - Serve as an expert on applications and provide technical support
-

Requirements and Skills

- Software Engineer – Dot Net (1 to 5 years)
- Strong in programming fundamentals in C#, .NET, and minimum 1 year experience in .NET Core
- 3–5 years of development experience with:
 - C#
 - JQuery
 - ASP.NET
 - .NET Framework 3.5+
 - Web APIs

- MS SQL/T-SQL Server 2012+
- Experience in developing web-based applications
- Strong analytical and problem-solving abilities
- Knowledge of SDLC and software engineering practices
- Requirements analysis, architectural design, development, and unit testing
- Familiarity with REST/RPC APIs and architectural styles
- Understanding of Agile methodologies
- Excellent troubleshooting and communication skills
- Attention to detail
- BSc/BA in Computer Science, Engineering, or related field
